

| <b>TENDER/QUOTATION EVALUATION CRITERIA</b> |  |
|---------------------------------------------|--|
| <b>SCHEME TITLE</b>                         |  |
| <b>SCHEME NUMBER</b>                        |  |

**Table 1**

| Apply the following list to the proposed scheme.                                                                                   | Yes | No |
|------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| Is the proposed scheme simple?<br>If yes state, provide details:                                                                   |     |    |
| Are the components and work elements of the proposed scheme standardised?<br>If yes state, provide details:                        |     |    |
| Are there numerous suppliers available with standardised outputs?<br>If yes state, provide details:                                |     |    |
| Are there any specific client requirements/restrictions that will impact on the scheme delivery?<br>If yes state, provide details: |     |    |

If 'No' is applicable to any of the responses, then the required evaluation criteria will be considered as quantitative and qualitative, and Table 2 must be completed.

**Table 2**

|                                                                                                                                                                                         |   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| Indicate which of the following criteria is/are considered as relevant factors in the evaluation of tender/quotation returns, when establishing the most economically advantageous bid. | ✓ |
| Price                                                                                                                                                                                   |   |
| Quality                                                                                                                                                                                 |   |
| Technical merit                                                                                                                                                                         |   |
| Aesthetic and functional characteristics                                                                                                                                                |   |
| Environmental characteristics                                                                                                                                                           |   |
| Running costs                                                                                                                                                                           |   |
| Cost effectiveness                                                                                                                                                                      |   |
| After sales service                                                                                                                                                                     |   |
| Technical assistance                                                                                                                                                                    |   |
| Delivery date                                                                                                                                                                           |   |
| Delivery period                                                                                                                                                                         |   |
| Period of completion                                                                                                                                                                    |   |
| Other (provide details):                                                                                                                                                                |   |

The responses to Table 2 will form the basis for the bid evaluation criteria that will be developed within the ITT documentation.
